

(2) Names and shares of each person sharing in the honey produced from the unit;

(3) The number of all colonies of bees belonging to the unit;

(4) The names of counties in which colonies of bees are located as of the date of the report; and

(5) A certification of the number of colonies reported including all colonies from which production is expected.

(e) The honey unit shall consist of all the producer's bee colonies, regardless of location.

(f) Producers must designate a FSA office as the control office for the honey operation. Producers must complete the following actions only in the control office:

(1) File an application for coverage;

(2) File a report of colonies;

(3) Report total unit production; and

(4) Request to change a unit's control office.

(g) Actions that may be taken in any Administrative FSA office includes:

(1) Designating or selecting another control office; or

(2) Filing a notice of loss in accordance with § 1437.10.

(h) Producers must notify the control office designated in accordance with paragraph (f) of this section within 30 calendar days of the date of:

(1) Any changes in the total number of colonies; and

(2) The movement of any colonies into any additional counties.

(i) Payments will be based on the amount of losses for this community in excess of a 50 percent loss level at a rate determined in accord with this part and the authorizing legislation.

#### § 1437.105 Maple sap.

(a) NAP assistance for maple sap is limited to maple sap produced on private property for sale as sap or syrup. Eligible maple sap must be produced from trees that:

(1) Are located on land the producer controls by ownership or lease;

(2) Are managed for production of maple sap;

(3) Are at least 30 years old and 12 inches in diameter; and

(4) Have a maximum of 4 taps per tree according to the tree's diameter.

(b) The crop year for maple sap production is the calendar year, January 1 through December 31.

(c) If producers file an application for coverage in accordance with § 1437.6, tree acreage containing trees from which maple sap is produced or is to be produced must be reported to CCC no later than the beginning of the crop year.

(d) In addition to the applicable records required under § 1437.7, producers must report the:

(1) Total number of eligible trees on the unit;

(2) Average size and age of producing trees; and

(3) Total number of taps placed or anticipated for the tapping season.

(e) A maximum county-expected-yield for maple sap shall be 10 gallons of sap per tap per crop year unless acceptable documentary evidence, as determined by CCC, is available to CCC to support a higher county-expected-yield.

(f) The average market price for maple sap must be established for the value of the sap before processing into syrup. If price data is available only for maple syrup, this data must be converted to a maple sap basis. The wholesale price for a gallon of maple syrup shall be multiplied by 0.00936 to arrive at the average market price of a gallon of maple sap.

(g) The actual production history for maple sap shall be recorded on the basis of gallons of sap per tap.

(h) The unit's expected production is determined by:

(1) Multiplying the number of taps placed in eligible trees; by

(2) The approved per tap yield as determined in accordance with § 1437.102.

(i) Payments will be based on the amount of losses for this community in excess of a 50 percent loss level at a rate determined in accord with this part and the authorizing legislation.
